# Cover Letter

Dear Hiring Manager,

I am writing to express my sincere interest in pursuing a career as a Cybersecurity Analyst. Currently enrolled as a student in STEM with a focus on Cybersecurity, I recently achieved certification in the field, equipping me with a solid foundation in threat detection, risk management, and incident response.

My academic journey has provided me with a theoretical understanding of cybersecurity principles, complemented by hands-on experience gained through self-study and practical projects. Notably, I have worked on my webpage, where I successfully applied my knowledge in identifying and mitigating security vulnerabilities and coding strategies.

What excites me about the field of cybersecurity is its dynamic nature and the constant need for professionals to adapt to emerging threats. I am committed to staying abreast of industry trends and have recently earned the IBM Professional Certification and many others, enhancing my technical proficiency with practical skills.

As I embark on this exciting career path, I am eager to contribute my passion for cybersecurity to a forward-thinking organization. I am impressed by the innovation and dedication to security, and I am confident in my ability to apply my skills to contribute effectively to any team in the cybersecurity industry.

Enclosed with this letter is my resume, providing additional insights into my academic and practical experiences. I welcome the opportunity to discuss how my skills and enthusiasm for cybersecurity align with the goals of your organization or any cybersecurity-focused role.

Thank you for considering my application. I look forward to the possibility of discussing further how I can contribute to the cybersecurity landscape.

Sincerely,

Sean Dressler
